Enterprise Security

Data/Voice/Video Integration

Remote Access Solutions

Network Maintenance Agreements

On-site Technical Services

Emergency Service Available

Preventative Maintenance

Backup Audit and Verification

Disaster Recovery planning

YOUR CHALLENGE

In today's distributed computing environment, business success is directly linked to the effectiveness of information, computers, networks and applications.

Organizations are challenged by the increasing number of choices for technologies like virtual private networks, voice recognition, electronic messaging and collaboration, network operating systems, Intranet, Extranet, and E-Commerce. But these challenges can be successfully addressed through effective network, security, and applications planning. Such planning should result in a strategy that balances industry trends, enterprise requirements, and vendor viability within an architecture framework that delivers functionality, integration, interoperability, security, manageability, and performance at an acceptable cost.

Without proper strategic planning, however, your computer infrastructure is a disaster waiting to happen, a source of costly management and incompatibility problems, and a serious vulnerability. Ultimately, you are responsible for which way it goes. The future of the enterprise depends on how knowledgeable you are and how prepared you are for what lies ahead.

OUR SOLUTION

Acrobases Computing, Inc. designs, evaluates, and integrates distributed LANs and WANs using Microsoft Windows NT/2000, and/or Novell Netware network and server operating systems in conjunction with a variety of industry standard protocols including TCP/IP, Ethernet, and Token Ring. Acrobases has engineers and technicians holding a variety of technical certifications from Microsoft, Novell, and Cisco, among others. Acrobases's engineers are highly skilled in designing, installing, and supporting complex and disparate networking and computing architectures.

MANAGING ENTERPRISE INFORMATION enabling *e-business*

LEAVE THE END-TO-END MANAGEMENT TO ACROBASE

SERVICES WE OFFER:

- ▶ **Network Design, Installation and Support Services**
Network design, installation and support services facilitate the integration of various hardware and software products in a network environment. This may include site surveys and analysis, network design, wiring design and installation, off-site setup and configuration, network operating system installation, on-site staging and installation, software application installation, and testing.
- ▶ **Hardware Maintenance and Repair Services**
Hardware maintenance and repair services coordinates the integration of various hardware products, including site surveys, analysis, wiring design and installation, off-site setup and configuration, shipping and delivery, hardware support, on-site staging and installation, diagnostics, and the dispatching of technicians to your location. We provide warranty and post warranty service. We explain repair options and provide cost estimates for repair and replacement. We offer preventive and scheduled maintenance based on your requirements and the manufacturer's recommendations. During repairs of critical equipment, loaner equipment is available at an additional cost.
- ▶ **Technical Consulting**
Technical consulting gives you access to our technical knowledge and resources. We seek the best solution for your needs with consideration for long-term objectives.
- ▶ **Software Installation and Support**
Software installation and support are important for the successful completion of any project. Our technicians are highly skilled in completing numerous software installations across many platforms.
- ▶ **Network Administrators Support**
Network administrator support gives your network administrators advanced network support. This level of support gives your staff access to all our knowledge and resources. We maintain a library of technical tools and information for supporting all our customers.
- ▶ **Additional Technical Services**
 - ▲ Education and Training
 - ▲ Relocation
 - ▲ Hardware and Software Inventory
 - ▲ Specification Assistance
 - ▲ Research
 - ▲ Bid Preparation
 - ▲ System Design
 - ▲ Complex Configuration Assistance
 - ▲ Software Customization and Development
 - ▲ Web Design and Web/Email Hosting
 - ▲ Application Hosting via Application Service Provider (ASP) model

Acrobace offers a complete service from supply through to cabling, installation, consultancy and project management. Since 1992, we have established a wide and prestigious customer base including some of the World's premier organizations that consult and trust Acrobace in providing for their requirements. At Acrobace we do not believe in just supplying products and solutions and then leaving clients to operate them alone or troubleshoot problems themselves. We prefer to partner our customers throughout our relationship by adopting a long-term approach to our clients needs. Acrobace's clients are drawn from all sectors, including finance, transportation, shipping, government, information technology, manufacturing, service provision, and education.

For further information on how Acrobace can help you with your network, computer services, and/or streamline your operation, please contact us at info@acrobace.com. We're ready to help.
